**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species:

Species 1: Figure 2 to a first embodiment, claims 1-12.

Species 2: Figure 13 to a third embodiment, claims 13-19.

2. The species are independent or distinct because inventions I and II disclose different embodiments. Species I discloses a first embodiment having only a memory, a reproducing unit, a control unit and an operation unit. Species II discloses a third embodiment including additional elements of a recording function, a detection unit for detecting a partition and a signal processing unit for producing recording data that are not elements of the first embodiment.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

Art Unit: 2615

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
